BUSH  
PERENNIAL GARDENS

HARDY  
PERENNIAL  
Flower Plants

WA. 4029

Roy E. Bush W. 66<sup>th</sup> St. & Washburn Ave. S. (Cpls.)

WE ARE IN NO WAY CONNECTED WITH ANY OTHER NURSERY

Flower Lovers:

As the Fall is an excellent time to arrange your garden and set out new plants, we are offering for your inspection the following list of hardy perennials. Plants which are set out in the Fall when the ground is cool, develop a heavy root system and are ready to send up an excellent stand of foliage and flowers the following season. Gardens thus established in the Fall are far ahead of those planted in the Spring.

Our plants are field-grown, State inspected, and apparently free from disease. All plants on this list are ten cents each or twelve for one dollar, unless otherwise specified. Twenty cent plants are six for one dollar. Twenty-five cent plants are five for one dollar. You may use ten and twenty cent plants in any combination to make up one dollar and twenty cents worth for one dollar; for example: Three twenty cent plants and six ten cent plants.

**EARLY BIRD SPECIAL:** In the Spring, during the rush season up to and including June 15th, we will give thirteen plants for one dozen before twelve o'clock noon.

We would appreciate your bringing plenty of cartons, if it is convenient, in which to pack your plants.

We have designated the height, color, blooming season, and soil preferred by the different plants. By following these, you can arrange your plantings as well as a landscape gardener, so that there will be a succession of bloom throughout the season. We dig the plants, which you select, with plenty of dirt so they will grow. Contrary to some people's ideas that plants can only be moved in the Spring or Fall, they can be safely moved at any time during the season by this method. Therefore, if you have a bare spot in your garden in midsummer, you can safely fill it with blooming plants.

**MAIL ORDERS:** We will be able to ship plants by mail

The tops will be pruned and the roots, free of soil, packed in sphagnum moss. We guarantee them to reach you in good growing condition. Beyond that we cannot be responsible. When they arrive, remove the paper wrappings, plunge them in cool water tops and all for a few seconds, and stand in a shady place for an hour before planting. This gives the plants a chance to supply themselves with water and conditions them for transplanting. The prices are the same for mail orders plus twenty per cent for packing and postage. Be sure to keep this list for identification

(See Other Side)

purposes, as your plants will be labeled by numbers only. Please give several substitutes in case we are out of your first choice. We do not accept mail orders for less than one dollar.

**HOW TO SEND MONEY:** Money is most conveniently and safely sent in the form of post office or express money orders. Checks are acceptable if ten cents exchange is added when drawn on banks outside of Minneapolis or St. Paul. We cannot be responsible for remittances of currency or silver.

**PREMIUMS:** To one out of each fifty customers who register, we give one dollar's worth of plants free. These names are selected by drawing, and the winner is notified. Mail order customers will be entered on the register as their orders are received and given this chance also.

### IDENTIFYING SYMBOLS

The meaning of the symbols following each plant listed are as follows: Height given in inches (").

#### COLOR

|                 |                     |                 |
|-----------------|---------------------|-----------------|
| P--Pink         | Sa--Salmon          | 6--June         |

blotch
- 221 Mayfield Giant Single golden yellow
- 222 Sunburst Double golden yellow 80% true double
- 230 CALLIRHOE (Kal-ir'-oh-ee) involucrata Wine Cups Crimson  
Trailer 10" S (RG) 7-8 Poor, dry soil
- 234 DAISY Oxeye (Marguerite) White Blooms all summer
- DELPHINIUM (Del-fin'-i-um) All like common soil combined  
with a little lime, and sun. Fine for cutting
- PACIFIC HYBRIDS This group of hardy delphiniums, considered  
the world's best by experts, has now been developed into  
definite named color strains. Huge florets are well spaced  
on five foot spikes. Plants are sixty-five per cent mildew  
resistant and ninety per cent double.
- 250 25¢ BLUEBIRD SERIES Cleanest medium blue with white bee  
Florets  $2\frac{1}{2}$  inches in diameter on very long, grace-  
ful spikes.
- 251 25¢ BLACK KNIGHT SERIES Darkest violet with black bee.  
Florets  $2\frac{1}{2}$  to 3 inches in diameter, very long, well-  
formed spikes, a true show flower.
- 252 25¢ GALAHAD SERIES Giant whites with white bees. Often  
3 inches in diameter.

- PHLOX It is our ambition to be able to offer a true to name line of phlox. However until we are able to propagate all the plants ourselves, this seems impossible. We buy our phlox from reliable nurseries, but occasionally we find an odd one among the various groups. If you should happen to receive such a one, we will be glad to furnish you with the right one if you will let us know.
- 620 20¢ Africa Carmine-red with blood-red eye, one of the best new dark-red varieties
- 625 20¢ Beacon Cherry-red with wine-red eye
